

Advanced Preflight at Rochester WINGS 2015!

Maintenance-related problems are one of the most deadly causes of accidents in general aviation. Pilots can learn to identify maintenance resources, processes, and skills to minimize and avoid discrepancies. The advanced preflight concentrates your preflight review of the aircraft's logs and paperwork, plus the physical inspection of the aircraft. Where do you find this paper trail of aircraft history and what do you do with it when you find it? As a pilot what are the 32 items you are allowed to maintain before you call your mechanic for intervention? Find the answers to these questions and many more at this informative safety briefing presented by FAA Safety Team Representative Joe Hood! Click on the link below for details and to register TODAY!

Directions: Take the NYS Thruway to Exit 46, proceed I-390N to Exit 17, turn right, proceed to 1295 Scottsville Road.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
